## **Michigan LCV Applauds State Legislators for Supporting a Strong Clean Energy Plan for Michigan**

ANN ARBOR – Michigan League of Conservation Voters (Michigan LCV) Executive Director Lisa Wozniak released this statement following the introduction of a clean energy package today:

“We applaud the leadership of state legislators putting forth a clean energy plan that will build on our success so far. Michigan’s commitments to clean energy have driven \$2.9 billion in economic growth, and better protected our air and water from pollution. We must keep up the good work and invest even further in renewables and reducing energy waste. Our current goals expire this year, and we cannot wait any longer to act on a clean energy plan that moves Michigan forward.”
